BULATSA

1 Brussels Blvd.
1540 Sofia,
Bulgaria

To whom it may concern,

We hereby confirm that in 2024, WxFUSION GmbH has successfully completed a demonstration project for the provision of data produced by WxFUSION's thunderstorm detection and nowcasting systems Cb-global and Cb-NowFor6. The data was provided in real time for Sofia FIR and its immediate vicinity. The data was integrated into BULATSA tCAT (traffic Complexity Assessment Tool) system in order to support the assessment of weather impact on air traffic controllers' workload and ATC sector throughput.

Based on this successful cooperation, BULATSA has taken the decision to renew the agreement with WxFusion GmbH for the provision of CB related data in 2025 and beyond.

For further information on the matter please contact: Mr. Rosen Penchev,Expert, Met Department, ATM Directorate BULATSA, *e-mail*: rosen.penchev@bulatsa.com, *tel.*: +35929371261
