

**Prof. Dr. Pascale Ehrenfreund  
Chair of the Executive Board  
German Aerospace Center (DLR)**

**"...WxFUSION is a spin-off of our DLR Institute of Atmospheric Physics, providing unequaled thunderstorm detection and nowcasting services – the key to safer flying – combined with enhanced commercial efficiency for airlines, airports and air navigation service providers.**

**It is an integral part of DLR's policy to bring our world-leading research results and technical expertise into market driven use cases and thereby create mutual benefits for customers as well as the society. We are closely collaborating with WxFUSION – including the core technology transferred from DLR to WxFUSION – to fully meet the demands in flight weather forecasting to foster the company's powerful access to the global marketplace. We strongly appreciate the professional commitment and passion of the founders of WxFUSION to turn T-storm information into a known and controllable factor for aviation - in a local and a worldwide scale..."**
